

TURNING CENTRIFUGE FC 400

Centrifuge FC 400. It is a machine at continuous feeding from conveyor or pneumatic transport. Suitable for treatment of 0,6 cm/h of short turnings. Construction is made with care as well as on steel quality chosen and heat treatments. The slot crown has a particular design for high efficiency and easy maintenance. The machine include a strong frame and an oil tank with two pumps; one for the centrifuge cleaning and the other one to convey oil to customer stock.
