

Costumized solutions for the treatment of waste from processing

# Paper SHREDDER

TRM

*Powerful machine for continuous shredding of paper, cardboard, cardboard cores, plastic and aluminum with limited energy consumption. Available in various models for different needs.*

- Sturdy structure to allow a long life even with continuous production
- Hydraulic operated pusher
- Grid support that can be opened manually
- Independent IP55 electrical panel, with integrated Siemens PLC

The “**TRM**” model shredders are sturdy, single shaft machines, with a dedicated fixing system of the rotating blades with cutting inclination that allow the **shredding of waste paper, cardboard, cardboard, plastic and aluminium cores with limited energy consumption.**

They are produced in three models and consist of a sturdy structure, a loading hopper with top loading, a single-rotor grinding chamber with interchangeable cutting inserts, a hydraulically operated pusher, a grid that determines the size of the shredded material. interchangeable, motorisation of adequate power depending on the model and electrical panel with integrated PLC.
