

Costumized solutions for the treatment of waste from processing

Paper SHREDDER

LUPO

Powerful machine for continuous shredding of paper, cardboard, textile waste and foam materials. Available in various models for different needs.

The “LUPO” model shredder is a sturdy machine consisting of a shredding chamber and two shafts rotating at different speeds with shredding rotors with spokes complete with interchangeable blades.

It is suitable for the continuous shredding of paper, cardboard, textile waste and foam materials.

Built in a series of models with loading inlet width from 1000 to 2500 mm. , it is able to satisfy a variety of productions.

The power supply must be dosed by conveyor belts or other systems as required.

Evacuation of the shredded material will be carried out by suction.
