

## BENCH FOR CLEANING OF PIECES

### DESCRIPTION

The cleaning bench is an accessory specially designed to facilitate cleaning/blowing of the worked pieces that still contain a large quantity of coolant

Made of sturdy painted steel sheet, the BP series cleaning bench is equipped with a drip grille in perforated sheet metal. The upper part is removable to access the oil containment tank.

The BP series cleaning bench is supplied complete with a compressed air gun to blow the worked pieces and for set up for connection to the suction line.

Thanks to the use of a manual or automatic damper (optional) it will be possible to adjust the suction of the cleaning bench or to activate its use in automatic mode.
