

F OIL FILTERS FOR THE FILTRATION OF OIL MISTS AND DUST

DESCRIPTION

The **F OIL** series Filter Units are compact, high-efficiency units specifically designed for the elimination of oil vapors and condensation. The aspirated oil vapors are conveyed into a gravitational pre-settling system which, through the effect of velocity change, allows for an initial stage of filtration. Only after the airflow has shed its heaviest components does it pass through multi-stage metallic coalescence pre-filters; it then proceeds through a third stage consisting of a series of high-efficiency soft pocket filters, specifically designed and continuously tested for oil vapor filtration, and finally through a fourth and final stage of F9-rated rigid pocket filters. The oily pollutants are collected in a hopper and then evacuated through a discharge outlet positioned at the top of the filter.

TECHNICAL DATA F OIL 1

Gravitational settling chamber
N°03 G2-rated metallic pre-filters
N°01 F9-rated soft pocket filter
N°01 F9-rated rigid pocket filter
Containment shell
Digital filter clogging indicators for the last two filtration stages
Press-bent sheet metal hopper, RAL 7016 painted, 30/10 thickness
Perimeter panels in galvanized press-bent sheet metal, 25/10 thickness
Front maintenance openings
Electric fan with 2.2/3/4 kW motor, built-in at the top of the filter

TECHNICAL DATA F OIL 2

Gravitational settling chamber
N°06 G2-rated metallic pre-filters
N°02 F9-rated soft pocket filters
N°02 F9-rated rigid pocket filters
Containment shell
Digital filter clogging indicators for the last two filtration stages
Press-bent sheet metal hopper, RAL 7016 painted, 30/10 thickness
Perimeter panels in galvanized press-bent sheet metal, 25/10 thickness
Front maintenance openings
Electric fan with 4/5.5/7.5 kW motor, built-in at the top of the filter

TECHNICAL DATA F OIL 4

Gravitational settling chamber
N°12 G2-rated metallic pre-filters
N°04 F9-rated soft pocket filters
N°04 F9-rated rigid pocket filters
Containment shell
Digital filter clogging indicators for the last two filtration stages
Press-bent sheet metal hopper, RAL 7016 painted, 30/10 thickness
Perimeter panels in galvanized press-bent sheet metal, 25/10 thickness
Front maintenance openings
Electric fan with 7.5/11/15 kW motor, built-in at the top of the filter (sound-absorbing lining upon request)

TECHNICAL DATA F OIL 6

Gravitational settling chamber
N°18 G2-rated metallic pre-filters
N°06 F9-rated soft pocket filters
N°06 F9-rated rigid pocket filters
Containment shell
Digital filter clogging indicators for the last two filtration stages
Press-bent sheet metal hopper, RAL 7016 painted, 30/10 thickness
Perimeter panels in galvanized press-bent sheet metal, 25/10 thickness
Front maintenance openings
Electric fan with 15/18.5/22 kW motor, built-in at the top of the filter, enclosed in a sound-proofed compartment

Max nominal airflow: 4,000 m³/h

Max nominal airflow: 8,000 m³/h

Max nominal airflow: 12,000 m³/h

Max nominal airflow: 16,000 m³/h

F OIL FILTERS FOR THE FILTRATION OF OIL MISTS AND DUST

MODEL	FOIL1	FOIL2	FOIL4	FOIL6
A - LENGTH [mm]	800	1500	1500	2250
B - WIDTH [mm]	800	750	1200	1400
C - HEIGHT [mm]	2500	2500	2700	3100
N° FILTERING ELEMENTS	1	2	4	6
FILTERING SURFACE [m²]	23.5	48	94	145
Max nominal AIRFLOW [m³/h]	4000	8000	12000	16000
POWER [kW]	2.2/3/4	4/5.5/7.5	7.5/11/15	15/18.5/22
WEIGHT [kg]	300	550	700	1450

SUPPLY

- F OIL series filters
- Electric fan
- Oil collection hopper
- Removable motor
- Soundproofed motor compartment (only on F OIL 6)
- Standard color RAL 7016

ACCESSORIES / OPTIONALS

- Industry 4.0 electric control panel
- Heat recovery unit
- Custom color
- F7 and F9-rated rigid drawer-type pocket filters
- H13-rated absolute filter (HEPA)
- Soundproofed motor compartment

TECHNICAL FEATURES

- Compact design
- High efficiency
- Up to 5 filtration stages

- Ensures compliance with the strictest regulatory limits
- Recovers condensed oil for reuse
